

Connect ParScore Exam Results to Your Learning Management System

Scantron makes it easier than ever to bring ParSystem™ test scores directly into your learning management system (LMS) gradebook. The ParScore Exam Data Export Tool help you identify the scores to transfer, then seamlessly and automatically creates properly formatted import files for your LMS.

Import Scores Easily

The Par Export Tool makes it easy to transfer test scores from ParSystem to the gradebook in your LMS. Simply log in using your existing ParSystem credentials, choose from a list of available tests, and select your LMS.

The Par Export Tool automatically creates a formatted, comma-separated value (CSV) file including complete connecting information to enrolled students.

Once that file is complete, simply upload it to your LMS, using your LMS import function. It's just that easy to automate score transfer, so you can focus on serving your students, instead of entering data.

Supported Learning Management Systems

- Canvas
- Blackboard
- Brightspace/Desire2Learn

Don't See Your LMS Listed?

The ParSystem experts in our Professional Services Group can help. Contact us for more information.
