  - English Language Arts (Grades K–10)
  - Mathematics (Grades K–12)
  - Reading (Grades 2–12)
  - Science (Grades 2–12)
  - Social Studies (Grades 2–12)
- Progress Monitoring College & Career Item Banks and Assessments
  - Mathematics (Grades K–8)
  - English Language Arts (Grades K–8)

"[Within a month] this company and its tireless and talented team had our 1,500 schools up and running. Scantron delivered not only a superior product but also a superior system of delivery, support, flexibility, and technical assistance. A project management team has met regularly with ALSDE staff in order to customize the product and support and to assure successful implementation in Alabama. Four full-time technical assistance staff have been assigned to Alabama this year, providing on-site support to schools and districts. Weekly progress reports are shared through teleconferences with key ALSDE staff. Immediate responsiveness is the norm for this company, as is a "no excuses" approach. Whatever it takes to actualize ALSDE goals for this project is what Scantron does."

Sherrill Parris, Deputy State Superintendent Alabama State Department of Education

Explore Your Data

Because today's educational environment heavily relies on metrics to drive curricular and instructional decisions, it's vital to have access to data. Scantron Analytics unifies your data into a single place, so you can explore results dynamically and uncover new correlations.

Scantron Analytics delivers up-to-date information through highly visual, easy-to-understand dashboards. Scantron Analytics simply stores data you're already collecting, sourced from a variety of educational systems, in memory—no need for an expensive data warehouse.

Capture Stakeholder Opinions

Scantron and My Student Survey have teamed up to provide you with a comprehensive, improvement-focused approach to school accountability. Stakeholder surveys are a great way to enhance your understanding of your educational environment and improve your school.

- Meet state accountability efforts for non-traditional measures
- Provide differentiated feedback for teacher evaluations and professional development

Access Instructional Resources

netTrekker®, the award-winning educational search tool, is integrated into Scantron's assessment solution, directly connecting scores to learning materials. The materials are aligned to identified needs so teachers can spend less time searching and more time teaching. netTrekker connects you to broad library of relevant digital resources to engage students in a learning experience that supports their unique needs.

netTrekker's educator-selected, standards-aligned digital resources are easily searchable by subject, reading level, grade, media type, state standards, source, and/or language.

Create Differentiated Instruction

In this era of increased accountability, educators are expected to clearly understand and utilize massive amounts of data to drive decisions regarding how best to help students succeed.

Edgenuity® and Scantron have a strong alliance that will not only provide you with rich, relevant data, but also goes a step farther by automating the personalized learning process. Linking Scantron and Edgenuity® solutions help you meet the needs of all learners, regardless of their academic strengths and weaknesses.
